

**BostonPolice** is hosting a  
DEPARTMENT

# CDR Tool Technician Level 1 & 2 Training

The CDR Technician Level 1 & 2 training course will follow the Collision Safety Institute prescribed syllabus. CDR Technician Level 1 & 2 training is a prerequisite for the CDR Data Analyst Course being offered at the same location on June 15 - 19, 2015. This course qualifies for 12 ACTAR CEUs.

## About the Courses:

### CDR Technician Level 1 (Basic CDR Technician)

The basic technician level training exposes the CDR System user to the basic functions of the Bosch CDR system so that, at a minimum, the user can confidently image data from supported vehicles using the standard OBD II ("DLC") port and, in most cases, directly from the airbag control module (ACM).

### CDR Technician Level 2 (CDR Technician Cert.)

Offered by regionally located CDR Technician Trainer/Mentors, this is the hands-on extension follow up to the Basic CDR Technician course offering individual or optimally small group guided instruction in (1) in-vehicle DLC data imaging, (2) module location and identification and direct-to-module data imaging, (3) practical booster and adapter applications and (4) "back powering" in-vehicle systems to enable DLC data imaging. This hands on instruction and then evaluation by a Trainer/Mentor would complete the CDR Technician Level certification.

## About the Instructor:

Mike Merolli's background includes a BSEE from UMass Lowell and 25 years of experience in Engineering, Law Enforcement, and Accident Reconstruction. He is Fully Accredited by ACTAR and Certified as a Crash Reconstruction Specialist by the Illinois Law Enforcement Training and Standards Board. Mike's CDR-related experienced includes 7 years as a Bosch CDR system Data Retrieval Technician and Data Analyst. He has used the CDR system as both a Police Officer and Insurance Fraud Investigator and was recently OEM approved and designated as a Bosch CDR system software beta tester. He is employed by MAPFRE USA / Commerce Insurance and is assigned to the Special Investigative Unit Data Intelligence Section as an Accident Reconstructionist. Mike resides in Massachusetts.

## Signup Details:

**When:** March 12-13, 2015  
8:30 a.m. - 4:30 p.m.

**Where:** Boston Police Academy  
85 Williams Ave. Hyde Park, MA

**Tuition:** \$299 per student
